Did you know that aluminum cans have been banned from North Carolina landfills for the past 15 years? In October, plastic bottles will also be banned from disposal. Renew your recycling efforts. Recycle your bottles and cans today. For more information about N.C. landfill bans, please visit p, the number 2, pays dot org (p2pays.org).

### 60 seconds:

Have you ever wondered what happens to that plastic bottle after you put it in a recycling bin? The bottle travels to a materials recovery facility where it is sorted from other recyclables. The baled plastic bottles are then sent to a facility that washes and then shreds the bottles into plastic bits called "flake." Another company then remolds the flake into new bottles. The new bottles are sent to a beverage bottling company that fills the bottles and distributes them to stores, where they can be bought and recycled again. Do your part of the recycling cycle: put your plastic bottles in recycling bins. And remember, plastic bottles are banned from North Carolina landfills starting October 1! Visit R E 3 dot org (RE3.org) for more details.

Did you know the average North Carolinian recycles only 72 plastic bottles each year? Did you also know that more than 2.4 billion plastic bottles are dumped in North Carolina landfills annually? Plastic bottles are now banned from disposal in any North Carolina landfill. This ban supports the recycling industry, which provides more than 14,000 jobs in North Carolina. Support your fellow Tar Heels. Call your local recycling coordinator today to find out about your community's plastic bottle recycling program. For more information about the landfill bans, visit p, the number 2, pays dot org (p2pays.org).
