Job Task

Fire Prevention

Hazard Review

1. Familiarize yourself with the location of fire equipment in the area where you work and the proper method of turning in a fire alarm.

2. Flammable liquids shall be handled and stored in approved safety containers equipped with flame arrestors and spring actuated caps.

3. Keep hand operated fire equipment such as extinguishers, hoses, etc. fully accessible, mounted, and unobstructed at all times.

4. If you use a fire extinguisher or any other fire equipment, notify your supervisor at once so that it can be immediately replaced and serviced.

5. Do not clean clothing with gasoline, solvents or other flammable gasses or liquid. A spark may ignite your clothing.

6. Never place cords near heat or water.

7. Always match plugs and outlets, making sure to never force a three-prong plug into a two-prong outlet.
