Job Task

Fire Emergency Responses

Hazard Review

Burn/ fire

1. Notify the Fire Department: 9-911.
2. Activate the building alarm (fire pull station). If not available or operational, verbally notify people in the building.
3. Isolate the area by closing windows and doors and evacuate the building (see Fire Evacuation), if you can do so safely.
4. Shut down equipment in the immediate area, if possible.
5. If possible and if you have received appropriate training. Use a portable fire extinguisher to assist yourself to evacuate, assist another to evacuate, and control a small fire.
6. If your clothing catches fire, smother the flame by rolling on the floor or ground. Never run, as this could cause the flames to spread.
