Steve is responsible for managing environmental operations to ensure sustainable disposal/reuse in support of production at the Novozymes North America enzyme manufacturing facility in Franklinton, N.C. Steve has a doctorate in agronomy and a master's in geology from Texas Tech University. Manager of Environmental Operations at Novozymes since 1994, his current duties include ensuring compliance with permits for residuals land application, wastewater spray irrigation, industrial stormwater discharge, hazardous wastes, solid wastes, and discharge of non-contact water. He is a licensed geologist and licensed soil scientist in North Carolina, and serves as the secretary/treasurer of the N.C. Board for Licensing of Soil Scientists. Steve also holds North Carolina certifications for land application, spray irrigation and grade II wastewater.
