

SOP - Lagoon Berm Maintenance

1. Lagoon berms shall be mowed as required to maintain grass no higher than 4".
2. Weekly inspect berms for excessive bare spots (greater than 4") and for animal burrows or erosion.
3. Animals that cause burrows can be live trapped (trap located at office) or baited (poisoned) bait located at office.
4. Insect damage to berms shall be controlled w/insecticide (located at office).
5. Any large bare areas will require reseeding and mulching thick enough to induce seed starting (mulch and seed are located behind office).
