

SOP - Heating Barns

1. Temperature and humidity are checked weekly by ABC Farms serviceperson and recorded on Nursery Service person Report located on clipboard in farm office. Temperature charts are recorded daily and located on center wall of each barn.
2. Follow company recommended temperature located above each thermostat in each barn on the center wall.
3. Insure hired hand curtain drops work correctly (see #2 SOP ref. Hired hands procedure).

All heaters are to be turned off after the 28th day of placement unless severe cold weather exists.
